Tropitone®

Assembled tables are
large & heavy. Put
together at place of use.

Stoneworks® Top Attachment Flat Underside

Thank you for selecting Tropitone furniture.

- ✓ Read through all steps before assembling tables together.
- ✓ Locate all items in the Parts List from your cartons.

WARNING: Do not try to lift or flip furniture with only one person. Furniture pieces may be heavy and awkward to handle, and may result in injury to persons or damage to property if not lifted properly.

WARNING: Do not sit on or put your full weight onto the table. Serious injury could result.

CAUTION: Proper screw length should allow 1/2” – 3/4” of threads to penetrate into the Top surface. Confirm proper screw length before starting Top attachment. See Step 1.

Parts List

Table Top	(4) or (6) #10 Screws, self-tapping, length is 7/8” to 1-3/4” for various bases
Table Base	

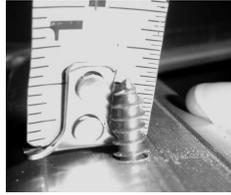

Tools Required

5/16” Socket Driver or Flathead Screwdriver Permanent Marker (Felt Tip)	Tape Measure Safety Glasses
-------------------------------------------------------------------------------	--------------------------------

Step 1

CAUTION: It is the assembler's and user's responsibility to confirm and install proper length screws to prevent damage to the Top.

Place one screw into the Table Base. Measure the length of the screw threads to insure they stick up $\frac{1}{2}$ " – $\frac{3}{4}$ ".

- x** *If the screw sticks up more than $\frac{3}{4}$ ", do NOT proceed. The screws are too long and will stick up through the Top surface.*
- x** *If the screw sticks up less than $\frac{1}{2}$ ", do NOT proceed. The screws are too short and will not properly secure the Top.*

Step 2

Prepare a smooth, non-scratch work surface (shipping container, a tarp or pool towels can be used). With two persons, place the Table Top upside down on the prepared work surface. With two persons, gently place the Base upside down onto the Top.

Step 3

Tops with Umbrella Hole

Center the Base on the underside of the Top; sight down through the umbrella support ring in the Base and align it to the Top.

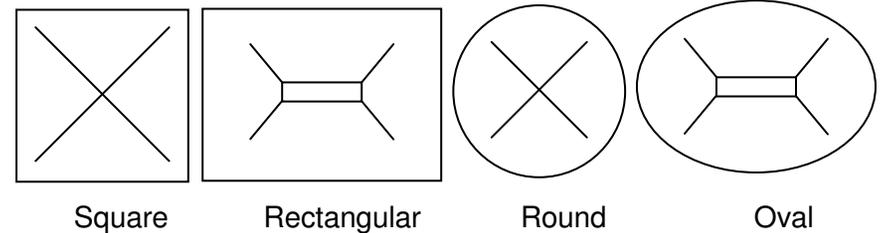

- **Square, Rectangular** Tops: Align the Base to the corners of the Top.
- **Round** Tops: Continue to step 4.
- **Oval** Tops: Align the Base to the edges of the Top.

Tops without Umbrella Hole

Center the Base on the underside of the Top.

- **Square, Rectangular** Tops: Align the Base to the corners of the Top. Measure equal distances at (4) places from the corner of the Top to the leg mount.
- **Round, Oval** Tops: Measure equal distances at (4) places from the edge of the Top to the leg mount.

Proper Base to Top orientation

Step 4

Attach the Base to the Top using the supplied screws at (4) or (6) places.

NOTE: After assembling one Table, turn the Table upright. Confirm the screws have **not** penetrated up through the top surface.

With two persons, lift the table upright while holding the Base near the (4) outermost Base to Top connection points.

Check that all the screws are firmly tightened at (4) or (6) places to retain the Top.
